

Learn More

Visit www.greenlegacycaskets.com for more information about our caskets, options, pricing and delivery. There you will also find more information about green burials.

Green Legacy Casket's products are approved by the Green Burial Council (www.greenburialcouncil.org), which works toward sustainable, viable, and meaningful burials.

Our Approach

Green Legacy Caskets, LLC respectfully approaches end-of-life ceremonies by providing environmentally responsible and economically affordable caskets for burial or cremation.

Many traditional products and services emphasize preservation, while Green Legacy Caskets instead thinks in terms of giving our bodies back to the earth.

Giving back to the earth

Giving Back
to the Earth

Green Caskets

Our caskets are 100% biodegradable. We build our caskets from locally harvested Ash and assemble them using animal hide glue that contains no volatile organic compounds (VOC). The handles are made of manilla rope. A wooden handle is available upon request.

The optional interior liner is made of 100% cotton, and the pillow, also optional, is made from natural fibers.

Our caskets fit into a standard size 30" vault, which many cemeteries require. They are also suitable for cremation.

Why Choose a Green Casket?

- To care for the environment
- To reflect a simple lifestyle
- To choose an economically sound option
- To honor the belief that preservation is not necessary

Add a Personal Touch

Friends or family members might find it meaningful to make or provide their own interior liner or pillow or to paint or stain the casket. We encourage such participation, believing that such care helps to grieve a loss yet celebrate a life.

Sustainable Funeral Practices
